STATE OF MARYLAND,

OFFICE OF THE STATE BOARD OF EDUCATION.

BALTIMORE, January 14, 1889.

To His Excellency, ELIHU E. JACKSON,
Governor of Maryland:

SIR : I have the honor to transmit to you the **Annual Report** of the State Board of Education, for the school year ending July 31, 1888, and the fiscal year ending September 30, 1888, with accompanying documents, as required by law.

Very respectfully,

Your obedient servant,

M. A. NEWELL,

Secretary.

REPORT

OF THE

State Board of Education.

The following summary, in connection with the accompanying tables, exhibits in a condensed form the most important facts connected with the administration of the public school system of the State, for the school year in the city of Baltimore ending December 31, 1887, and in the counties ending June 30, 1888; and for the fiscal year ending December 31, 1887, in the city, and on the 30th of September, 1888, in the counties. The several items are compared with the corresponding items for 1887 :

Number of schools in Baltimore city.....	128	
“ “ “ “ the counties.....	2,031	
Total.....		2,159
Being an increase in 1888 of.....	35	
Number of different pupils, city.....	54,210	
“ “ “ “ counties.....	122,377	
Total.....		176,587
Being an increase in 1888 of....	1,189	
Highest number enrolled in one term, city	41,555	
“ “ “ “ “ “ counties.....	106,687	
Total.....		148,242
Being an increase in 1888 of....	2,869	
Average number in daily attendance, city	33,969	
“ “ “ “ “ counties	61,007	
Total.....		94,976
Being a decrease in 1888 of....	1,434	

Number of teachers, city.....	1,007	
" " " counties.....	2,661	
Total.....		<u>3,668</u>
Being an increase in 1888 of.....	117	
Number of months schools were open, city.....	10	
" " " " " counties.....	8.8	
Average for the State.....		<u>9.2</u>
Being an increase of one-tenth of a month.		
Receipts from all sources, city.....\$	733,614.66	
" " " " counties.....	1,085,990.04	
Total.....		<u>\$1,819,604.70</u>
Being an increase in 1888 of \$40,927.45		
Amount paid for teachers' salaries, city..\$	604,334.40	
" " " " " counties.....	740,171.40	
Total.....		<u>\$1,344,505.80</u>
Being an increase in 1888 of \$41,019.24		
Amount paid for building, repairing and furnishing school houses, city.....\$	66,464.18	
Amount paid for building, repairing and furnishing school houses, counties.....	97,089.26	
Total.....		<u>\$ 163,553.44</u>
Being a decrease in 1888 of \$41,840.14		
Amount paid for books and stationery, city \$	40,304.38	
" " " " " " counties.....	49,584.50	
Total.....		<u>\$ 89,888.88</u>
Being a decrease in 1888 of \$9,998.50		
Amount paid for rent, fuel and incidentals, city.....\$	59,504.98	
Amount paid for rent, fuel and incidentals, counties.....	62,416.03	
Total.....		<u>\$ 121,921.01</u>
Being an increase in 1888 of...\$31.43		
Total expenses for Public School purposes, city.....\$	781,604.12	
Total expenses for Public School purposes, counties.....	1,046,574.18	
Total.....		<u>\$1,828,178.30</u>
Being a decrease in 1888 of....\$3,648		

Excluding the city of Baltimore, the county schools show the following results :

Number of schools.....	2,031	
Increase in 1888		<u>31</u>
Total number of scholars enrolled.....	122,377	
Increase in 1888.....		<u>1,200</u>
Highest number enrolled in one term....	106,687	
Increase in 1888		<u>2,186</u>
Average number enrolled.....	95,405	
Decrease in 1888		<u>434</u>
Average number in daily attendance....	61,007	
Decrease in 1888		<u>560</u>
Number in first grade.....	23,762	
Increase in 1888.....		<u>739</u>
Number in second grade.....	15,869	
Increase in 1888.....		<u>451</u>
Number in third grade.....	17,990	
Decrease in 1888.....		<u>150</u>
Number in fourth grade.....	17,679	
Increase in 1888.....		<u>229</u>
Number in fifth grade.....	14,610	
Increase in 1888.....		<u>274</u>
Number in sixth grade.....	9,602	
Increase in 1888.....		<u>427</u>
Number above sixth grade.....	3,162	
Decrease in 1888		<u>241</u>
Number studying book-keeping.....	1,799	
Decrease in 1888.....		<u>13</u>
Number studying algebra.....	4,751	
Increase in 1888.....		<u>462</u>
Number studying philosophy.....	2,742	
Decrease in 1888.....		<u>21</u>
Number studying drawing	2,413	
Decrease in 1888.....		<u>5,411</u>
Number studying geometry.....	1,359	
Decrease in 1888.....		<u>416</u>
Number studying physiology.....	14,616	
Increase in 1888.....		<u>4,416</u>

Number of teachers (including assistants)		
—Men—white, 820, colored, 220; total...	1,040	
Women—white, 1,381, colored, 240; total	1,621	
	<hr/>	
Total.....	2,661	
Increase in 1888.....		79'
		<hr/> <hr/>
Average number of months schools were open.....	8.8	
Increase in 1888, one-fifth of a month		
		<hr/> <hr/>
Amount received from State school tax, (white schools), free school fund, and academic donations.....\$	337,048.19	
Increase in 1888.....		\$ 9,423.58
		<hr/> <hr/>
Amount received from State school tax, appropriated to colored schools.....\$	78,547.64	
Increase in 1888.....		\$ 32.44
		<hr/> <hr/>
Amount received from county tax.....\$	500,783.89	
Increase in 1888.....		\$ 42,981.10
		<hr/> <hr/>
Amount paid for teachers' salaries.....\$	740,171.40	
Increase in 1888.....		\$ 26,449.60
		<hr/> <hr/>
Amount paid for building, repairing and furnishing school-houses... ..\$	97,089.26	
Increase in 1888.....		\$ 1,139.64
		<hr/> <hr/>
Amount paid for books and stationery...\$	49,584.50	
Decrease in 1888.....		\$ 8,375.78
		<hr/> <hr/>
Amount paid for supervision and office expenses.....\$	42,889.38	
Increase in 1888.....		\$ 304.09
		<hr/> <hr/>
Amount paid for incidental expenses, including fuel and rent.....\$	62,416.03	
Increase in 1888.....		\$ 1,171.82
		<hr/> <hr/>
Amount paid for interest.....\$	5,208.45	
Increase in 1888.....		\$ 1,108.60
		<hr/> <hr/>
Amount paid for miscellaneous expenses..\$	3,918.48	
Increase in 1888.....		\$ 464.67
		<hr/> <hr/>
Amount of indebtedness paid.....\$	45,296.68	
Increase in 1888.....		\$ 3,239.26
		<hr/> <hr/>
Total expenditures for public school purposes in the counties... ..\$	1,046,574.18	
Increase in 1888.....		\$ 25,501.90'
		<hr/> <hr/>

The items of expenditure which show an increase are :

Teachers' salaries.....	\$ 26,449.60	
Building, repairing and furnishing.....	1,139.64	
Supervision and office expenses.....	304.09	
Incidental expenses.....	1,171.82	
Interest.....	1,108.60	
Miscellaneous.....	464.67	
Indebtedness paid.....	3,239.26	
Total.....		\$ 33,875.68

The item which shows a decrease is :

Books and stationery.....	\$ 8,375.78
Showing a net increase of expenditure in 1888.....	\$ 25,501.90

In a comparatively stationary population, such as we have in our rural districts, the statistics of any year cannot greatly differ from those of the preceding year. But taking a longer interval, a comparison will show clearly the direction and the rate of movement.

Comparing the figures for this year with those of five years ago (1883) we have the following results :

Increase in number of different pupils.....	9,494 ; 8 per cent..
“ “ average enrollment.....	11,614 ; 14 “ “
“ “ “ daily attendance.....	7,288 ; 14 “ “
“ “ amount received from State school tax.....	\$ 36,977.83 ; 15 “ “
Increase in amount received from county taxation.....	80,355.55 ; 19 “ “
Increase in total receipts from all sources..	124,266.41 ; 13 “ “
“ “ “ expenditure.....	111,334.83 ; 12 “ “

LEGISLATION.

With one exception—the law requiring temperance physiology to be taught—there has been no general legislation on school matters from 1874 to 1888 ; and much of the steady progress of the system is due to the feeling of confidence and permanence which the conservative spirit begets. Several changes in the school law of minor importance have been recommended from year to year by the State Board of Education, and need not here be repeated. Should the next General Assembly attempt a general revision of the school law, the suggestions of the State Board will doubtless be duly considered.

The last General Assembly passed five General Laws and one Joint Resolution relating in whole or in part to public schools.

PUBLIC GENERAL LAWS.

Chapter 533 raises the rate of State school tax from ten cents to ten and one-half cents on the hundred dollars. Chapters 481 and 526 enact that the sum appropriated to colored schools shall be raised from \$100,000 to \$125,000, provided "that if the amount paid into the treasury on account of the tax for public schools should not amount to \$125,000, then the amount distributed to colored schools in excess of \$100,000 shall only be the amount paid into the treasury from said tax in excess of \$500,000.

Chapter 382 provides that the elements of agricultural science may, in the discretion of the State Board of Education, be taught in the State Normal School and in the public schools of the state.

Chapter 386 re-enacts the corresponding sections of the public school law relating to teachers' certificates, with the proviso that after six months' probation, the examiner may issue a certificate which shall continue in force for five years.

NOTE — The only change is from *three* years to *five*.

Joint Resolution No. 6 transfers \$57,818.68 from the sinking funds to the credit of the free school fund.

LOCAL LAWS.

Chapter 534 authorizes the Board of School Commissioners of Charles county to pay as yearly "salary to each public school teacher in said county, holding a first-grade certificate, the sum of \$400, and to each public school teacher holding a second-grade, first-class certificate, the sum of \$350; and to each public school teacher holding a second-grade, second-class certificate, the sum of \$300; and to any person permitted to teach in said county without a certificate, such sum as in their judgment may seem adequate for the services rendered, for each school year."

Chapter 58 adds Garrett to the counties (Montgomery, Prince George, Charles and Caroline) in which the

School Commissioners are appointed, not by the judges of the Circuit Court, as in the other counties, but by the Governor "by and with the consent of the Senate."

Chapter 15 requires the county commissioners of Carroll county to provide for a special term in the schools of said county.

At the same session of the General Assembly, the following Acts relating to public education were also passed :

Chapter 14, authorizing Mount Saint Mary's College, in Frederick county, to issue bonds, not to exceed fifty thousand dollars.

Chapter 23, appropriating money to pay instalments of State school tax withheld from Garrett county, on account of inability to keep its schools open seven and a half-months.

Chapter 55, giving assent to an Act of Congress to establish an experiment station in connection with Maryland Agricultural College.

Chapter 90, section 5, giving one-half of fines collected under Act for better protection of partridges, pheasants, woodcock and rabbits in Howard county to public schools of said county.

Chapter 93, authorizing School Commissioners of Worcester county to appropriate money for building and repairing school-houses and purchasing school-house lots in said county.

Chapter 95, section 6, giving one-half of fines collected under Act protecting oysters in Somerset county to public schools in said county.

Chapter 98, section 18, authorizing the Mayor of Baltimore city to pay to the County Commissioners of Baltimore county the value of the school-houses within the limits of the territory described under said Act.

Chapter 120, enabling trustees of West Nottingham Academy, Cecil county, to borrow money for its use

Chapter 126, section 1, giving one-half of fines collected under the Act for preventing destruction of fish in Garrett county, to public schools of said county.

Chapter 130, section 3, giving one-half of fines collected under the Act for preventing non-residents from

fishing or hunting in Garrett county without permission, to public schools of said county.

Chapter 135, section 178, giving fines collected under the Act to enable voters of Worcester county to determine by ballot whether spirituous or fermented liquors shall be sold in that county, to public schools of said county.

Chapter 138, section 3, giving fines collected under the Act empowering the Cecil County Agricultural Society to protect its grounds and exhibitions, to public schools of said county.

Chapter 138, section 6, providing that no person shall be required to take out any license, to whom the agricultural society aforesaid has granted the privilege of buying or selling, provided the said society shall pay twenty-five dollars annually for use of public schools of said county.

Chapter 158, authorizing County Commissioners of St. Mary's county to levy money for building school-house for white children in election district number five in said county.

Chapter 161, section 5, giving one-half of fines collected under Act for preservation of birds and game in Montgomery county.

Chapter 162, authorizing County Commissioners of St. Mary's county to levy money for building school-house for white children in Foster's neck, in said county.

Chapter 182 authorizing County Commissioners of Howard county to issue bonds to build school-house or houses in said county.

Chapter 183, incorporating asylum and training school for the feeble-minded of Maryland.

Chapter 225, authorizing County Commissioners of Washington county to issue bonds for building school-houses in said county.

Chapter 236, section 2, giving fines collected under the Act to regulate storage of gunpowder and other explosives in Anne Arundel county, to public schools in said county.

Chapter 241, providing for building school-house for white children in first district of Prince George county.

Chapter 250, authorizing county commissioners of Prince George county to levy money to buy ground and erect school-house for white children in Laurel, in said county.

Chapter 258, section 7, giving one-half of fines collected under Act enabling voters of tenth election district of Prince George county to determine by ballot whether or not spirituous or fermented liquors shall be sold in said district, to public schools of said county.

Chapter 286, authorizing County Commissioners of Talbot county to borrow money to build and furnish school-houses in said county.

Chapter 292, section 11, giving fines collected under the act enabling voters of Harford county to determine by ballot whether spirituous or fermented liquors shall be sold or not in said county, to public schools in said county.

Chapter 292, section 173, giving one-half of fines collected under above act to public schools of Harford county.

Chapter 309, section 3, giving fines collected under the act for better protection of fish in Howard county to public schools of said county.

Chapter 331, incorporating the Industrial Educational Association of Baltimore City.

Chapter 332, section 7, giving one-half of fines collected under the act to regulate fishing in the Patuxent river, to the public schools of the county in which the offence is committed.

Chapter 338, sections 97 and 101, giving money received for oyster licenses and fines collected in Somerset county, to public schools of said county.

Chapter 344, section 2, giving fines collected under the act preventing trespass in Worcester county, to public schools of said county.

Chapter 347, section 1, giving one-half of fines collected under act preventing sale of fermented or spirituous liquors or lager beer within one mile of Phoenix factory, to public schools of Baltimore county.

Chapter 350, authorizing County Commissioners of Charles county to levy money to erect school-house near Rock Point, in said county.

Chapter 353, sections 5 and 8, giving money received for licenses to non-residents of Charles county to kill game and wild water-fowl in said county, and fines for same, to public schools in said county.

Chapter 362, section 1, giving one-half of fines collected under act to prevent dredging, etc., in Potomac river, and one-half of the proceeds of the sale of confiscated boats, etc., to public schools of Prince George county.

Chapter 375, section 27, paying expenses of sloops guarding the oyster beds in Dorchester and Talbot counties out of funds paid as license to scrape in the Choptank river, and heretofore given to public schools of said counties.

Chapter 377, appropriating \$400 annually, for two years, to Crisfield Academy, in Somerset county, and constituting it a high school.

Chapter 399, continuing the appropriation of \$1,000 a year to Charlotte Hall school for five years.

Chapter 408, appropriating \$2,256 for the relief of St. John's College.

Chapter 419, section 2, giving one-half of fines collected under act preventing snaring of pheasants and partridges in Frederick county, to public schools of said county.

Chapter 479, empowering County Commissioners of St. Mary's county to levy money for building school-house in sixth election district of said county.

Chapter 517, section 8, giving fines collected under act for better protection of sheep in Anne Arundel county, to public schools of said county.

Chapter 521, section 2, giving one-half of fines collected under act for better protection of deer in Garrett county to public schools of said county.

Chapter 532, appropriating money to sundry schools and charitable institutions in Maryland, for 1889 and 1890.

Chapter 538, sections 4 and 6, giving money collected for licenses, and one-half of fines collected, under act for better protection of woodcock, pheasants and rabbits in Baltimore county, to public schools in said county.

Chapter 543, section 10, giving one-half of fines collected under act to protect and preserve fish in Washington county, to public schools of said county.

Chapter 532, appropriating for each of the years 1889 and 1890 :

To Knapp's English and German Institute.....	\$1,200
“ Maryland Institute of Baltimore.....	6,000
“ Western Maryland College.....	1,300
“ Baltimore Manual Labor School.....	2,000

Chapter 326, reconstructing the Board of Trustees of Maryland Agricultural College, as follows: 18 trustees, 5 to represent the private stockholders; six, namely, the Governor, the Comptroller, the Treasurer, the President of the Senate, the Speaker of the House of Delegates, and the Attorney General, to represent the State's interest; the United States Commissioner of Agriculture, *ex-officio*, and one practical farmer from each Congressional district, to be appointed by the Governor by and with the consent of the Senate.

Chapter 328, appropriating \$872.63 for repairs to the State Normal School.

Report of the Secretary.

REPORT OF THE SECRETARY.

The tables which follow give, both in summary and in detail, all the facts regarding the public schools, which can be easily reduced to a tabular form. The details are so minute that any citizen can ascertain the exact cost of any school in which he may be interested, under the several heads of Teacher's Salary, Books and Stationery, Fuel, Furniture, and Incidental Expenses.

But, in order to obtain a more comprehensive view of the history, progress, present condition and future prospect of the schools, a copy of the following circular was sent to each of the examiners. The replies (where any replies were given) are annexed, slightly abbreviated by the omission of the formal beginning, and ending:

DEAR SIR :—The tabular matter for the Annual State School Report has all been arranged and is ready for the printer. I desire to express my obligations to those examiners who kindly aided me by sending their reports so long in advance. I am now anxious to have some interesting reading matter, and have to call on you again for assistance. I mention the following topics as suggestions, though you need not confine yourself to them :

1. The general progress of education in your county since you became Examiner.
2. The good results (if any) of your school visitations.
3. Teachers' Institute; County Associations; District Associations. Have you held any or all of these? The advantages (if any)?
4. Manual Training and Industrial Training. Anything done or contemplated in this direction?
5. School Exhibits at Agricultural Fairs.
6. Teachers' Reading Circles. How many? If none at present, what prospect for the future?
7. School Libraries. How many? Of what use? If none, why?
8. Suggestions for the advancement of popular education (*a*) by means within the county (*b*) by legislation.

Yours truly,

M. A. NEWELL, *Secretary.*

ALLEGANY—H. D. WEIMER. No reply.

ANNE ARUNDEL—JOHN C. BANNON, Examiner.

Since my appointment in February last I have been busy organizing a system in the office, with very little opportunity for outside work. It is needless for me to enter into detail about the condition in which I found the system when I came into office, for you are fully aware of it yourself.

Not having the correct data in the office, it was impossible for me to make a financial statement other than from Feb. 1st to Sept. 30th, 1888, instead of Sept. 30th, 1887 to Sept. 30th, 1888. From the report it can be seen that the Board is \$1,976.14 in debt, but I believe if all the debts, for which we are responsible, contracted for by the previous Board were paid we would be at least \$3,000 in debt. Again, I find nearly all the schools in need of immediate repairs and furniture, which will cause considerable outlay.

The Board has built two new houses and repaired two, which was nearly equivalent to rebuilding the same.

I doubt if there is any county in the State whose school system needs more attention. I hope that there will be improvement before the next report.

BALTIMORE COUNTY—CHAS. B. ROGERS.

By the annexation to Baltimore City of that portion of Baltimore County known as the Belt, twelve white and three colored schools, with an average enrollment, respectively, of 3,823 and 549 pupils, in all fifteen schools with a total average enrollment of 4,372 children, have been taken from Baltimore County and added to Baltimore City. As the annexation of the Belt took effect on June 1st, 1888, during the summer term of the schools this Board and the Mayor and City Council of Baltimore entered into a contract, whereby it was agreed that the Belt schools should be continued for the month of June under the management of this Board, at the expense of Baltimore City. The cost of running said schools for said month of June was \$4,645.70, as appears in this report. The furniture in the Belt schools was bought by the Mayor and City Council of Baltimore for \$4,500, as shown by this report. Of the fifteen Belt school-houses taken into Baltimore City by annexation of the Belt, the titles of ten are vested in the Board of County School Commissioners of Baltimore County, three were rented buildings, and two were given free of rent. The cost to the School Board of Baltimore County for the erection of the ten Belt school-houses, and the purchase of the lots upon which they stand, was about \$73,800, for which Baltimore City is to pay, as set forth in an award made by a commission appointed for such purpose, the sum of \$68,250. After annexation there was some doubt as to whether this Board would receive for the use of the schools this sum of \$68,250,

but it appears to be a well-settled and conceded fact that such will be the case, which will enable this Board to pay off its long standing indebtedness and to promptly meet its current expenses. The books, slates and maps in the Belt schools, with a cost price of \$4,021.67, could not be disposed of to Baltimore City at any figure, and the requisition for books from each and every one of the 156 schools of Baltimore County will be supplied from this stock until it is exhausted.

On June 30th, 1888, the total average enrollment of pupils in the public schools of Baltimore County, including the Belt, was 11,801. Average enrollment of Belt schools 4,372, and average enrollment of the public schools in Baltimore County, not including the Belt, 7,429. On date 156 public schools are in operation in Baltimore County, 125 of which are for white children and 31 for colored children.

The account known as Office Account, for fiscal year ending Sept. 30th, 1888, is \$7,418.79. This account embraces the salaries of the Board and its officers, attorneys' fees, office rent and expenses, stationery and blanks, account books, &c., printing and advertising, school-house insurance, traveling expenses of the examiner, recording deeds, interest on borrowed money, and other items as per report; of this sum, \$1,000.84 was expended for interest and discount on sums borrowed to pay salaries of school teachers.

The cost of running the public schools of Baltimore County for year ending Sept. 30th, 1888, including the Belt schools and exclusive of the Office Account, was \$175,364.24. Receipt for book fees was \$17,950.79. The cost of running said schools, with book fees deducted, \$157,413.45. The cost of running Belt schools was \$54,315.51; Belt school book fee receipts, \$4,928.02; cost of Belt schools, with book fees deducted, \$49,386.49. The cost of running the public schools of Baltimore County, independent of the Belt, was \$121,048.78; book fees from said schools, \$13,022.77; cost of running public schools independent of the Belt, with book fees deducted, \$108,025.96.

The cost of new school buildings and additions to school buildings, \$13,538.82, is not included in the above cost of running schools, and will be found in detail upon the first page of this report.

CALVERT—DR. P. BRISCOE. No reply.

CAROLINE—M. B. STEPHENS.

The fruits of our Reading Circle are already visible. I do not say it boastingly, but I believe our teachers are more earnest and active than heretofore, and becoming more efficient every day. The Institute seemed to stimulate them for the year's work, and the course prescribed by the Reading Circle's committee tends to increase their qualifications for teaching.

CARROLL—JAMES A. DIFFENBAUGH.

Compared with that of the preceding year, our county school report exhibits a decrease of 213 in the enrollment, and of 228 in the average attendance. The falling off is due, in large measure, to a forced closure of the schools for two or three weeks at the end of the winter term.

The County Commissioners refused to make any provision whatever for new school houses in their levy for the year, unless the School Board would agree to drop one term of school and use the money appropriated therefor as a building fund, in connection with what the County Commissioners would give for the purpose. The vital necessity for many new houses, the hope of securing a liberal allowance, and their desperate financial condition, induced the School Board to accept this unwelcome proposition; whereupon the County School Commissioners donated \$2,000 for building purposes, in addition to the regular appropriation for schools. Although grievously disappointed in the amount, the School Board kept the agreement in good faith on their part and closed the schools at the end of the winter term.

Great dissatisfaction among the school patrons followed, which led to the passage of an act by the General Assembly directing the County Commissioners to provide immediately thereafter the sum of \$10,000, for a special term of school, of eleven weeks, to take the place of the regular spring term. The schools were re-opened, but were not so well attended as if there had been no break.

The County's representatives in the General Assembly, particularly Senator Pinkney J. Bennett and Delegate Daniel Ebaugh, for the courage, intelligence and public spirit which secured the prompt passage of the act and the relief thereby afforded, are worthy of all praise.

The critical inquiry into school needs which this episode awakened has led numbers, who had supposed that the appropriations for schools was sufficient, and many more who had previously given the matter little thought, to see the straits to which the school authorities are reduced, and has enlarged and intensified the demand for more liberal provision for school purposes.

The County annalist of public school affairs is almost necessarily limited, in his stated deductions, to a comparison of one year with another as to the practical matters of the attendance, grading and comfort of pupils, and the sufficiency of school supplies. It is rarely allowed him to widen the sweep of his vision towards the far horizon of the educational landscape, and consider discursively its various topographical features.

Now and then, however, circumstances seem to justify some such effort. The current calendar year is the fifth of service by the present school authorities of this County. During their tenure they have labored diligently, impartially and conscientiously for the interests which they have in charge. Thirty-one new school-

rooms—22 of brick, 6 of frame, 2 of stone and 1 of concrete—have been built and paid for. Extensive repairs have been made and a large quantity of new furniture has been purchased.

Much is yet to be done before it can be claimed that all the children who attend the schools are comfortably housed and seated. But it is deemed impossible that any Board, with the means at hand, could have done more in this direction in the given time.

The supplies of stationery and ordinary text books have been as liberal as the requirements of the schools demanded.

The laws and regulations for school government have been made plain, and rigid inspection has been made to secure their judicious enforcement.

By examinations for promotion, it has been sought to make merit the ground of advancement from one grade to another.

Thus, all that circumstances permitted has been done for the comfort, equipment and management of the schools. Yet it cannot be denied that they are not as efficient or as far-reaching in their benefits as they might be.

Non-attendance and irregular attendance curtail their usefulness and efficiency to a considerable extent. The population of the County is, in round numbers, about 40,000, which indicates a school population of at least 8,000. The enrollment at the various private schools of every grade in the County does not exceed 600. That of the public schools was last year 6,417, leaving 1,000 persons of legal age in the County who do not attend school at all, and there is reason to believe that the number is much greater than this.

The teachers and trustees have been asked to take a census of all persons of the legal school age in their respective districts, and indicate those who do not attend any school, with the reasons as far as can be ascertained, so that steps may be taken to remove the difficulties and secure their attendance.

But of those who do go to school and seem to value the privilege, many attend so irregularly as to prevent all benefit to themselves, and seriously hinder the progress and success of the school. How to lessen this evil has been a subject of anxious inquiry on the part of the school authorities. Appeals to the parents have produced little, if any, effect. It is difficult to convince those whose children are chronic absentees that it makes much difference, either to them or any one else. They are ready enough to find fault with the school, but are unwilling to aid in trying to make it better, or to secure its benefits for their children by forcing them to attend.

If means could be devised to arouse and quicken public sentiment on this point, so that a parent would be ashamed to have his children out of school without sufficient cause, great good would be thereby accomplished for those immediately concerned, and for humanity in general.

Next to this evil of irregular and non-attendance, comes that of inefficiency, narrowness and want of general information on the part of teachers. The complaint here made comes up from every

County and State. There are teachers in all, doubtless, whose good deeds shine out amid the surrounding darkness, like the little candle in Portia's watch-tower. But they are not the majority. It is, no doubt, equally true that the standard of qualifications and methods has for years been steadily rising. Yet, notwithstanding all efforts to prevent it, numbers of school-masters and school-mistresses everywhere begin their work without due preparation, and continue it without a thought of trying to keep pace with its progress, or an aspiration above gliding through its daily schedules with the least possible inconvenience to themselves. They study nothing, they read nothing, they observe nothing bearing on their profession, and consequently they learn nothing about it.

To this evil we have given special attention, through teachers' associations, official visits, circular letters and private admonitions, which have been freely employed for the purpose.

We have labored to destroy the sombre and exacting routine of the task-master, which has held so many generations of school children in pedagogical slavery. We have demanded the true resultant of educational forces—not acquired knowledge, but trained powers—and have striven to cure the frightful waste of time which results in sending our young men and women into the world, after years of schooling and hundreds of lessons, so ill-taught that they can scarcely make the simplest every-day calculations, know almost nothing of their language and its uses, and have either a vague or a distorted idea of their own capabilities and the purpose of their creation.

We have insisted that the proper function of the public schools is not to make learned men and women, but good citizens—well qualified and prepared for the ordinary duties of life. We cannot measure the force and effect of our labors. Many good results are cheerily apparent, but their full fruition seems to linger. We hope for material aid in this behalf from a Teachers' Institute, which is to be held at the close of the next winter term, and a Teachers' Reading Circle, which has been organized with some ninety members, and has started with flattering prospects of success and usefulness.

CECIL—REV. JOHN SQUIER.

We have advanced much in the way of school facilities since 1870. We have built sixty-five new school-houses for the county; all of these are supplied with furniture of the most approved kind, with blackboards, many of which are entirely of slate, generally extending across the whole end of the house, and from three to three and a-half feet high. These houses have cost from \$10,000 to \$700, most of them between \$750 and \$1,000, accommodating between sixty and three hundred pupils each. We think there is a very great difference between the character of these houses, their furniture, blackboards, etc., and the mean, ill-built and poorly-furnished building of twenty years ago; there is a contrast, but no comparison between them.

School visitation is of much importance to the welfare of the school, and also of the teacher. Every few years there is, to a great extent, a new class of teachers, and the visits of a superintendent, if he knows what a school ought to be (and he should know), will be of much advantage to these teachers. I have found by experience that both pupils and teachers have been encouraged and pleased by such visitation; not by mere fault-finding, but by kindly pointing out not only the best way of teaching, but also the best method of learning.

We have had both institutes and district associations, and their benefits are beyond question. 1. They are pleasant for social intercourse among the teachers. 2. They awaken a spirit of inquiry intellectually, and enlarge the minds of the teachers. 3. They excite emulation and interchange of thought, and the sharp exercise of debate often brings out powers, both of thought and expression—which otherwise would have lain dormant. Many teachers being, to some extent, autocratic in the school-room, come to think that their own way of doing things is just about right; but they get the conceit taken out of them most effectually, and are not permitted to hibernate after their own fashion, by their attendance at these meetings.

We have no industrial training yet, and you are well acquainted with my views; there is much to be said in favor of *complete training*.

Our exhibits have not been general (I mean a majority of the schools), but they have been very creditable, and have received commendations and prizes. These have been for drawings, and some for collections of flowers, grasses, etc.

We have no Reading Circles among teachers, as such, though there are some in the County of which teachers are members. In our district associations, historical reading has been prompted by the discussion of historical questions.

Our school libraries are not of much account, though I think about one-half of the schools have raised sums varying from ten dollars to one hundred dollars, but the larger sums have been expended mostly for organs. The School Commissioners have promptly aided these efforts wherever made.

I should wish to engage the co-operation of patrons more effectually with the teachers, but it must be *co-operation*, and this, I fear, is far in the future. Fault-finding, captious criticism and downright opposition, these are very common; but hearty and sympathetic co-operation is confined to the minority. Yet, the public schools are making themselves felt, and demanding—I should say commanding—the commendation of the community. Their character is not so uncertain as it was twenty years ago. The man who steps from one of our schools of 1868 into one of 1889 will find a wide difference between the dingy cabin with slab seats, where a blackboard a few feet square was something to be proud of, and the school-house of to-day with its handsome furniture,

double-sashed windows, with a smooth slate 24x3 or 3½ feet. Nor will the contrast be in the house alone; he will find, in most cases (not in all I am sorry to say), a different set of teachers. It is enough to say, as some old teachers have said, that the demands are double what they were. I said "not all"; a few have kept their first estate—I wish they had fallen from grace and been lost.

We feel strong here. Our schools are doing their work and daily growing in general appreciation and esteem. You know our County has not been backward in the County levy; true, this present year we shall only run three terms, but we received \$8,000 for new houses, which still gives nearly \$30,000—more than double of what we receive from the State.

Now let the State at once restore the one hundred thousand dollars a year taken from the white school fund; let there be no deficiencies in the State appropriations to the schools; we have been too long the scapegoat for defaults in the State collections.

Our County has advanced her levy from about \$11,000 or \$12,000, since 1867, to \$30,000; but the State, while keeping its face towards the public schools, is walking crab-fashion—backwards.

CHARLES—F. J. MADDOX.

Our Board has endeavored to expend judiciously the surplus that could be spared in enlarging and repairing our school-houses, but they have studiously guarded against going beyond their means in so doing, and at the same time have kept the other wants of the schools fairly supplied.

The general progress of education in our county since my administration of affairs began, I think has kept pace at least with the past. I have had the hearty co-operation of a zealous corps of teachers, and have no reason to think that from this standpoint we have gone behind.

My official visits to the schools have been very pleasant to me, and I think have had a tendency to engender a spirit of emulation with both teachers and pupils. It has been my habit when visiting to make such suggestions as I deemed expedient for their general advancement.

The Teachers' Association of our county has not been as well attended as it should have. We have some very active members, who have endeavored to reap the benefits to be derived, but the majority have totally neglected it. As yet we have not been able to establish a Teachers' Reading Circle, and I fear the future has but little in store for us, as the teachers are scattered long distances apart, and for the most part are not provided with ways to attend.

I regret to say that we have no school libraries, nor have we anything pertaining to manual training or industrial training. Inadequate funds have debarred us from making these essential additions.

DORCHESTER—DR. J. L. BRYAN. No reply.

FREDERICK—GLENN H. WORTHINGTON.

The financial statement shows that the Board is free of debt and has a small cash balance on hand.

So gratifying a condition of the finances is due to the fact that the County Commissioners, appreciating the importance of free public institutions, did not refuse to grant, at the earnest request of the School Board, a somewhat larger appropriation for public school purposes; and to the further fact that under the efficient management of the present comptroller of the State treasury, Hon. L. V. Baughman, there has been no falling off in the State school tax or free school fund, as has frequently been the case heretofore.

The School Board was thus enabled, with strict economy, to keep the schools open for seven and a-half months without carrying a considerable indebtedness into the accounts of the next year, as the insufficiency of the revenue has rendered necessary for several years past.

Though this showing is very gratifying to the Board, it is to be regretted that, even with the somewhat larger revenue, it was only possible to obtain such result by leaving undone much that was and still is necessary to be done. Very many schools are entirely destitute of school apparatus, maps, charts and the like, and a school period of at least nine months in every year is very much desired. For all of which we must depend upon the liberality of the County Commissioners.

A high school department has been established in the public school at Middletown, where the studies of the 7th, 8th and 9th grades are being taught by Prof. Wm. L. Avis, a graduate of Dickinson College.

A high school is much needed in Frederick City, and the recommendation of the secretary of the State Board of Education to the effect "that the few remaining county academies should be made a part of the public school system" is heartily approved by this Board. The academy (or college) at this place receives \$800 per year from the State, which fund in other counties goes to the public schools, and should in all fairness be applied to the same purpose in this county.

The Examiner has prepared and put into the hands of teachers, a schedule or course of instruction by which the work of each grade is clearly defined. It is believed that the schedule will be an assistance to teachers, by systematizing their work, and will conduce to greater thoroughness in the methods of teaching.

During the year ten teachers' associations have been organized, which hold meetings once a month. In connection with several of these, reading circles have been formed, and are important adjuncts to the associations.

Under a special act of the Legislature of 1880, authorizing the County Commissioners to appropriate annually a sum not exceeding \$10,000 for the purpose of building and furnishing new school-houses, ten new houses were contracted for during the year, several of which have been completed and are now occupied and used for school purposes. The Commissioners have also had one house that was burned rebuilt. The total cost of building and furnishing these houses will approximate \$8,000. This power in the hands of the County Commissioners is a source of inconvenience and embarrassment to the School Board, and it is hoped the law will be amended by the next Legislature so that the amount levied for school-houses may be expended by the School Commissioners, who are more directly concerned in school matters, and who are better acquainted with the condition of school buildings in the County.

The small number of official visits to schools is due to the protracted illness of the Examiner.

GARRETT—WM. HINEBAUGH.

Having only entered upon the duties of the position I now hold, the first of last July, and not having access to the records belonging to the office, I am unable to make any comparison with former years. During the fall term I visited fifty-eight schools, and found them, with two or three exceptions, in a flourishing condition. The teachers are generally active in their work, and realize the importance and responsibility of their position. I feel confident that by visiting the schools much good can be done. It encourages and stimulates the teachers, and creates an interest in the patrons in the education of their children. The Examiner can frequently render valuable help to young and inexperienced teachers by introducing and recommending new and better methods of instructions, and plans or rules for conducting the school. Much and valuable information to the Board can thus be gleaned by the Examiner, in acquiring a knowledge of the condition of the school buildings, furniture, &c.

We have in the County five organized district associations, which are well attended and doing good work.

We held a County Institute in Oakland, on the 27th and 28th of December, 1888. Notwithstanding the rain and snow and almost impassable condition of the country roads, the attendance was good. The exercises were interesting and instructive, and enjoyed by all present. The teachers received fresh zeal, new light and new methods, which will tell for good in their various schools.

Prof. H. G. Weimer, Examiner, from Allegany County, was present and gave us much valuable help.

What we need more especially for the advancement and success of the public schools of Garrett County is more money. We cannot possibly, with the funds at our command, on an average, run the schools over four a half months per year, which would leave us

very little money to build school-houses, furnish suitable furniture—things much needed almost all over the county. We feel that an injustice is done us in the apportionment of the State funds, on account of the amount appropriated especially for the benefit of colored children, in addition to the apportionment made for children both white and colored between the ages of five and twenty years. Garrett County not having over twenty colored children between said ages, consequently receives little of the fund for colored children. Our taxpayers are paying liberally for the education of their children—nearly twenty-seven cents on the one hundred dollars—probably more than any other county in the State, and still the amount is wholly inadequate for the success of the schools of our county. We hope a change will be made in the near future in our school law, which will place us in this matter on an equal footing with other counties of the State.

HARFORD—JOHN D. WORTHINGTON.

The past school year in Harford has for the most part been a satisfactory one.

But while our credit has been good, our payment of obligations prompt without borrowing, and our treasury shows a healthy balance at the end of the fiscal year, we feel that more money is sadly needed, especially for teachers' salaries. This results not from a low rate of taxation, but from the steady increase in the number of schools without any substantial increase in the taxable basis. A new assessment of property would probably give us a fair revenue, without an increase in the rate of taxation.

Our average attendance was very seriously reduced by a number of epidemics, notably measles and whooping cough, which followed each other in rapid succession during the winter and spring. The general interest in the cause of free education was never healthier in the county.

The canning business entirely closes about ten schools for the first two months, and cripples as many more.

During the year the Board has built and furnished three houses. They are all good buildings, well adapted to their purpose, but the one at Forest Hill (5-3) is very justly the pride of the neighborhood. It has two large rooms, which communicate by sliding-doors, with abundant cloak-rooms attached, and will seat one hundred and twenty pupils.

We have no better evidence of the general interest felt in the schools, as well as the work produced by them, than the large and varied display made at the last agricultural and mechanical fair. It embraced every kind of work which pertained to the school-room, and the display was always crowded with interested visitors. Over one-third of the schools furnished exhibits; and sixty dollars in premiums, paid half by the Association and half by the School Board, were distributed among over one hundred pupils.

The faculty of the Normal School will please accept thanks for their valuable services during our Teachers' Institute in September last.

HOWARD—JOHN T. THOMPSON.

In educational matters, as well as in other respects, our county is making haste slowly. Every year we build one or two new school houses, and we generally supply these and a few others with new and improved furniture. A number of our schools still have poor furniture, and are deficient in their supply of blackboards, maps and globes.

The number of school libraries has increased during the past two years, and a greater interest is now taken in this branch of school work than formerly. During the same period of time an earnest effort has been made all along the line to grade our schools, and I think I can safely say that the public schools of Howard County are better graded than ever before.

The questions for the annual examination of pupils were made out by the Examiner two years ago, for the first time in the history of the county. These examinations are based upon the schedule adopted by the State Board of Education, and have done much towards securing more perfect gradation in our schools.

The Examiner ever finds the teachers ready to accept his advice, and to co operate with him in improving and advancing the public school system of the county.

The school-room is the best place to meet the teacher for advice and consultation, and the good results of the Examiner's visit to a school are generally visible when he calls again to examine the school.

Teachers' Associations are held about three times a year; but no Institute has been held for a number of years.

Nothing has yet been done in the way of manual or industrial training, but we hope to accomplish something in that direction during the ensuing scholastic year. A Teachers' Reading Circle has been organized; and, though the beginning is small and not very promising at this time, we hope to do something to second the efforts of the promoters of this worthy institution.

Our schools closed throughout the county on the 15th day of June—two weeks before the close of the scholastic year. A lack of funds compels us to do this every year. Our county now makes a larger levy for the schools than ever before, and all we ask of the State at this time, for the improvement of our schools, is—*more money.*

KENT—E. F. PERKINS.

During my incumbency the school-houses of the county have increased from forty-six to sixty-three, the number of pupils from 2,820 to 3,751. The public schools are universally availed of, there being but one small infant private school in the county.

It is embarrassing to discuss the results of the Examiner's visits to the schools, but I am conscious that the aggregate results are helpful, and tend to make the work more efficient and uniform than it would otherwise be. It is very essential that teachers beginning the work should have the assistance of an experienced visitor. During the entire term of my office an efficient County Teachers' Association has not once failed to hold its regular meetings; and in view of the fact that almost the entire corps of Kent County teachers have been educated for the work or have long experience, it has not been deemed absolutely essential to hold annual Institutes in addition to the meetings of the County Association.

District Associations have from time to time been started, but it seems very difficult to maintain these organizations.

I very much favor district associations, and if they could be held on a school day, at first one and then another of the schools of the district, the teacher to go on with the regular work of the school during the morning session, and the special work of the association during the afternoon, I think they might be sustained. Teachers require, and very much desire, to see some other school at work.

The advantage resulting from our county meetings is recognized by all of our teachers, and the work, with few exceptions, is cheerfully and conscientiously entered into. The work of the association is always apparent at school visitations thereafter.

Special effort is made to encourage some voluntary manual work by the pupils of all of the schools, and at some time during the school year to have an exhibition of it in the school, to which the public is invited. A very successful exhibit was made at the county fair in 1887, at the cost of very great labor to the Examiner, the teachers being unable to participate in the work. I would suggest that, from each particular school exhibit, a number of the most meritorious articles be selected and exhibited at the county fair, as by other regular exhibitors.

Teachers' Reading Circles have been brought to the attention of our teachers. None have been formed, and the prospect is not encouraging for the future. For teachers to engage in annual institutes, county quarterly associations, district associations and reading circles, would seem to so completely engage all of the teachers' time outside of the school-room, aside from that essential for preparation for the class-room, as to completely absorb him in school work. "Man cannot live by bread alone," nor do I think a teacher can be most successful whose mind never reverts to any other than school work.

Of District School Libraries we have none, and they have not been encouraged by the County Board because, with our present district school-houses, their preservation seems impracticable. If the law provided for a county teachers' library instead of the district library, there would be some good practical results.

The suggestion to place one female on the several boards of district school trustees is worthy of the most careful consideration.

MONTGOMERY—J. J. HIGGINS. No reply.

PRINCE GEORGE—THOS. S. STONE.

*1. Our schools have gradually improved, public education has grown in popular favor. In confirmation of this statement, the County Commissioners gave this year more money for school purposes than the School Commissioners asked for.

2. If an Examiner does his duty moderately well his visits do good. The good accomplished here is, in large measure, due to the Examiner's visits to the school-room.

3. We have in operation a Teachers' Association, which meets four times a year. Teachers here attend these meetings, and most of them seem to take an interest in the proceedings. I believe the Association does good.

4. We have done nothing in the direction of manual training in our schools, unless drawing can be so classed.

5. We have had no exhibits to offer.

6. We have just formed a Reading Circle, and purchased the books recommended by the committee of the State Teachers' Reading Circle. All the teachers of white schools, with four exceptions, have joined. I am not prepared to state any opinion as to results, but hope it may do good.

7. We have five libraries; they are of great benefit. Would like to have one in each school.

8. I have no suggestions to offer; in my opinion, our school law is an excellent one. We need a little more hard cash. I believe the time has come when the State should increase the school tax. Schools here have been kept open for four terms for the past three years.

QUEEN ANNE—L. L. BEATTY.

We have built one colored school-house during the year just ended. We have now in course of erection three new buildings and an addition to a fourth; all will be completed, paid for and occupied by November. We are out of debt, with finances in good condition.

1. I think the schools are progressing fairly; there seems to be a greater interest manifested, especially by the parents.

2. I can see a decided improvement in the appearance of the school premises. The teachers are encouraged to work for the best results in the methods of education and in school management. Frequent visits establish freer intercourse, official and social, between teacher and Examiner, thereby enabling them to work together.

3. We hold Associations quarterly. It is impossible to estimate the good they do. The teachers in this county are taking a much more active part in them than formerly, performing their duties with zeal and energy, and gladly taking advice from each other.

4. We have no Manual Training schools in the county; more attention is being paid to drawing.

5. No exhibits at any fair.

6. We have Reading Circles now in every district, and I think they will be productive of much good.

7. A number of our schools have libraries, and the children where we have them have formed a taste for good reading. We try to select such books as will instruct as well as interest, avoiding as much as possible all light reading.

8. In the county, by giving such salaries as will induce teachers to make teaching a permanent profession, and not a stepping-stone to some more profitable employment; State legislation, by having a system of text-books common to all counties—that is, each and every county in the State to use the same books, and to have a thoroughly graded system, the same in each county.

ST. MARY'S—FRANK N. HOLMES.

The general progress of education has been for the past five years satisfactory to school authorities and, as far as we are able to judge, entirely satisfactory to the patrons. The only difficulty we encounter is the want of sufficient funds for the necessary school buildings and furniture, and the conveniences and appliances necessary for more successful instruction.

School visitations do not accomplish all that might or could be expected of them. If the Examiner could give notice of the visitation much better results could be obtained; but in the country, where the visitations must depend upon the condition of the weather and roads, such an arrangement is impracticable.

We have good and effective teachers' associations, white and colored, representing more talent, interest and influence than at any previous period in the history of the public schools of our county, but we have no district associations.

Our Teachers' Association holds eight regular meetings in the year, four on Saturdays and four on Fridays, the Board making no charge for lost days if accounted for in the regular quarterly reports.

There has been nothing done or contemplated in the direction of manual training and industrial training.

We have no Teachers' Reading Circles as yet, but the teachers' associations have taken steps for their establishment throughout our county.

There is nothing that can be done, in our judgment, to increase the success and efficiency of our schools until additional provision is made by the State for their maintenance. Talent and intel-

lectual labor are in the market, but we have not the means to purchase them. Other interests outbid us—offer better inducements—and pay more money. If the State, however, would see that the money levied for the public schools was applied to that interest, we should have little, if any, reason to appeal for aid.

SOMERSET—W. H. DASHIELL.

(1.) *Teachers.*—Regular annual examination and systematic renewals of certificates have done much to keep up the standard of our teachers. I have held five annual examinations, and others as required. I have examined 350 applicants for teacher's certificates, besides candidates for the various college scholarships. In obedience to the requirement of the State Board of Education, at the last examination "Theory and Practice of Teaching" was added to the usual branches, and all teachers were tested in this. I have also commenced the new system of classification of teacher's certificates, according to ability and skill displayed in the school-room, although I find this task neither easy nor enviable. Our corps of teachers is now good, and I think they will compare favorably with those of our sister counties. We have some few graduates of the State Normal School, and some who attended but did not graduate. There is yet a dearth of normal training! To remedy this in part, I have endeavored to keep the advantages of such training before the public, and to fill the scholarships in the State Normal School; seven are now attending that institution. It is not our aim to send any who do not intend to teach, and we desire all to graduate. I think I can safely say that the standard of our teachers is higher than it has ever been. As a class, they are more studious and do more effective work in the school-room. The reading of educational works and journals has been recommended, and the teachers have responded, as is evinced by the condition of the schools and the interest of the various communities about the school centres. As a stimulus to these improvements, three years ago a county teachers' association was organized, of which there have been semi-annual meetings devoted to the discussion of professional subjects. This association has been eminently successful. An association of the colored teachers was also organized shortly afterwards, which too has succeeded well. To remedy the great difficulty of procuring suitable colored teachers, it has been found necessary to re-examine some annually, and the examination of these somewhat exaggerates the number of applicants as stated above. An additional help has been found in the summer normal class organized two years ago, which has been successful.

(2.) *Pupils.*—The number of pupils enrolled in our schools remains about uniform, as does also the average attendance. The fall and summer terms show a depletion of pupils in rural districts, and the winter term some depletion in our tide-water districts; the former occasioned by the demand for the children's assistance in

farm work, and the latter by the departure of the older boys to engage in oyster dredging. In some of our districts this depletion has been so great that it has been necessary to threaten the execution of the law relating to diminished averages. The great impediment, however, in the way of more successful organization and grading, is the irregular attendance of pupils, and I think a reward might safely be offered for a specific for this trouble.

(3.) *Grading.*—It is usual to speak of the ordinary district school as ungraded. This is true in some respects; and yet, in a limited sense, our country schools are all graded as well as those in our towns. Care is taken by the teacher and Examiner to carry out the law in this respect, and the schedules recommended by the State Board are thoroughly observed; no pupils are promoted to a higher grade until all the work of the lower has been completed, and pupils are classified as belonging to the lower grade until this is done. In many schools it has been found necessary to employ one or more assistant teachers, and the schools have been arranged so as to divide the work as evenly as possible; in these cases the grades are even more thoroughly kept up, and with a view of bestowing special attention to each. As a result, there are always numerous applications from outside districts for admission to this class of graded schools. The majority of our schools have only the six primary grades, with occasionally a case or two of the seventh, but pupils are not classified as belonging to the higher unless all the studies in it are pursued. Our five high schools give ample opportunity to those who desire to pursue the higher branches. In most of the schools regular examinations are held, to which trustees and patrons are invited.

(4.) *Text Books.*—In my former report I advocated *free text books*; I still adhere to that opinion. The two things that most seriously obstruct thorough organization and grading are irregular attendance and lack of text books. Teachers complain bitterly that their wishes to keep their schools properly graded are frequently defeated by parents declining to furnish books for their children. As the law does not extend to this particular, nothing is left for the teacher to do in cases of persistent refusal except to keep the children in the lower grades or to adopt a system of oral instruction. These cases, although exceptional, are numerous, and the majority of them are attributable to financial pressure rather than obstinacy. Books are furnished by our County Board to those who are certified by the trustees as totally unable to buy them, but great care has to be practiced lest the trustees be imposed upon. Teachers are directed to keep accurate account of such books, to report to the School Board their condition and return.

(5.) *Examiner's Official Visits.*—The granting of certificates and the inspection of the schools in many states form the main part of the county superintendent's work. The arduous office duties incumbent upon the County Examiner of our State have a tendency to

prevent him from devoting as much attention to school visiting as he ought. I have found that schools thrive on official visitation properly bestowed. I consider the following some of the important reasons for regular and systematic visits on the part of the Examiner :

1. To give trustees, teachers and scholars a correct view of the importance of organized and systematic work.
2. To observe the methods of the teacher, and to aid him in improving them.
3. To see that the schools are properly organized and graded.
4. To become more intimately acquainted with the teachers, and to excite ambition to more successful work.
5. To inspect the buildings and grounds, and to be able to report their condition accurately when required.
6. To create and increase interest on the part of the people in their school.

During my examinership I have visited the schools of the county regularly ten times. In all, I have made to present date over 600 official visits. As a result, I find myself personally acquainted with each teacher; I find the schools more thoroughly organized and graded; I find the teachers more studious and ambitious in their work; I find increased interest on the part of trustees and people; I find the school-houses and furniture in many places improved, repairs executed, and new buildings and equipments in others.

(6.) *School Libraries.*—Wherever a district has, in accordance with the law, raised the sum of money therein required for this purpose, the School Board has always promptly responded with a similar sum. As a result, we have quite a number of excellent school libraries. In this connection, I would suggest that the law be changed so as to place the selection of books in the hands of the teacher and Examiner. Trustees are not always competent to do this work.

(7.) *Practical Suggestions.—Financial.*—Schools cannot be operated without money, nor successfully with a too restricted allowance. Our schools are increasing, and the demand for means increases with them. We desire to keep abreast of the times. I would suggest for the improvement of our schools, in this respect, (1) an improvement of our local resources to supplement the present fluctuating oyster revenue. I submit the following table of receipts from this source for our county for the last thirteen years, and I can furnish a similar list for the other tide-water counties if desired :

Receipts from Oyster Licenses, 1876.....	\$2,630 25
" " " 1877.....	1,780 45
" " " 1878.....	766 00
" " " 1879.....	1,434 50
" " " 1880.....	629 85
" " " 1881.....	2,818 65
" " " 1882.....	1,668 20
" " " 1883.....	2,641 00
" " " 1884.....	2,803 75
" " " 1885.....	6,080 36
" " " 1886.....	6,206 73
" " " 1887.....	5,899 56
" " " 1888.....	4,111 29

I am glad to report that our County Commissioners last year increased our levy \$1,000.00; it is still too small considering our needs. (2) *State Legislation* so that the State school tax may be not less than 12 cents on the \$100. I was a member of a committee that waited upon the Legislature at its last session to secure this change. A bill was introduced in the House of Delegates favoring a change, but like many others it met an untimely end. Before the adjournment of the Legislature, however, it was understood that an increased appropriation would be made for the public schools. The general appropriation act *seems* to have this end in view; but from the present indications we have no reason to infer that the act will be of any service to us.

In conclusion, I desire to express my appreciation of your kindness in assisting me in my efforts to improve the general caste of education in our county, and for many valuable suggestions which, with the assistance of an appreciative and effective Board, I have been able to carry into effect.

TALBOT—ALEX. CHAPLAIN.

On behalf of our teachers and school officers I extend cordial thanks to the principal of our State Normal School and the lady teachers from the same school, for their valuable aid and instruction at our Teachers' Institute, which was opened on the 29th day of last August.

The Normal Institute for Colored Teachers was kept open for three weeks immediately after the close of the schools for the summer vacation. The work of the Institute was thorough, as far as it went, and the interest of the teachers in the lectures, class exercises, general discussions and study, was maintained through the entire session.

The public school exhibit at our county fair attracted more attention than any other department, and was the subject of favorable comment in the newspapers, both at home and in the city of Baltimore. One of our county newspapers said: "Division No. 9, Public School Exhibit, Prof. Alexander Chaplain, superintendent, is a new division this year, and the fine exhibit shown was both a surprise and a delight to the citizens of the county." One of the Baltimore papers said: "One of the greatest attractions in the main building was the display of drawing, penmanship and general work of the public schools of the county. The display was a credit to the county, and should have been awarded a better position for examination."

In arranging for the exhibits, every teacher was requested to send specimens of work to the office of the School Board not later than the first day of September; and, in order to secure uniformity and set definite limits to the exhibit, confining it to the actual primary performances of the pupils in their respective grades, I also sent to the teachers copies of the following:

EXHIBITS FOR PUPILS OF

FIRST GRADE.

- Specimens of Writing, on trial paper, using half-sheet cap paper, and writing only on one side.
- Specimens of Figures, in script.
- Specimens of Drawing.

SECOND GRADE.

- Specimens of Writing, on trial paper.
- Specimens of Picture Cutting.
- Specimens of Paper Braiding.
- Specimens of Drawing.
- Specimens of Copying from Second Reader of the "Evening Hymn," beginning on page 43.

THIRD GRADE.

- Specimens of Writing, on trial paper.
- Specimens of Descriptive Composition, using a simple picture, and writing only on one side of half-sheet cap paper. If the pupil is unable to draw the picture, let it be pasted on the top of the composition page.
- Specimens of Perforated Cardboard Embroidery.
- Specimens of Mat Weaving.
- Specimens of Drawing.
- Specimens of Copying from Third Reader of the 1st, 2d, 3d and 6th stanzas of "Speak Gently," beginning on page 114.

FOURTH GRADE.

- Specimens of Writing, on trial paper.
- Specimens of Descriptive Composition.
- Specimens of Perforated Cardboard Embroidery.
- Specimens of Mat Weaving.
- Specimens of Drawing.
- Specimens of Map Drawing.

FIFTH GRADE.

- Specimens of Writing, on trial paper.
- Specimens of Descriptive Composition.
- Specimens of Graphic Analysis in English Grammar.
- Specimens of Drawing; freehand and original designs for borders, etc.
- Specimens of Letters for lettering maps.
- Specimens of Map Drawing.
- Specimens of Drawing in Physiological Charts.

SIXTH GRADE.

- Specimens of Writing, on trial paper.
- Specimens of Descriptive Composition.
- Specimens of Graphic Analysis in English Grammar; advanced work in complex and compound sentences.

- Specimens of Drawing ; freehand and original designs.
- Specimens of Letters for lettering maps.
- Specimens of Map Drawing, from memory.
- Specimens of Drawings in Historical Maps and Charts ; History of United States.

SEVENTH GRADE.

- Specimens of Composition ; advanced work in completion of language lessons.
- Specimens of Graphic Analysis in English Grammar ; advanced work.
- Specimens of Drawing ; advanced work in freehand and inventive.
- Specimens of Drawings in Physical Geography, Maps and Charts,
- Specimens of Drawings in Historical Maps and Charts ; History of England.

EIGHTH GRADE.

- Specimens of Composition ; advanced work, with analysis of the theme.
- Specimens of Drawing ; original designs for surface decoration, perspective drawing, and specimens in mechanical drawing.
- Specimens of Drawings in Physiological Charts ; advanced work.
- Specimens of Drawings in Physics.

No directions were given as to specimens of work to be sent in from the ninth and the tenth grades, though one of our high schools sent some excellent specimens of advanced drawings from these grades, and they were given a place with the general public school exhibit.

The space assigned for the exhibit by the directors of the Fair Association was entirely too limited for even all of the best work, and I had to exercise no little care and judgment in selecting specimens of work for exhibition which were of superior quality only, and showed painstaking and thoughtfulness on the part of the pupils.

I directed that the teacher, if necessary, should properly mount the specimens of work, and on each should be written, first, the number ; second, the grade of the pupil ; third, the name of the school ; fourth, the name of the teacher. The names of the pupils executing the work sent in for our exhibit were to be withheld, until after the decisions of the judges appointed by the directors of the Fair Association to award the premiums for the best specimens of work in the different grades. Each teacher was directed to make out, by grades and numbers to correspond to the specimens sent from the school, a key to the exhibit of the school ; and, after placing it in a sealed envelope properly marked or labeled, to place it in my custody as superintendent of the public school exhibit. The key, after each number corresponding to the number placed

by the teacher on the specimen of work, disclosed the name of the pupil who executed the work; and after the judges had awarded the premiums, the sealed envelopes were opened and the keys were used for discovering the names of the pupils entitled to be placed upon the premium lists. The reasons for withholding the names of the pupils until after the judges have decided upon the merits of the specimens of work in the exhibit are obvious.

The scheme for premiums presented by me to the Board of Directors of the Fair Association was, for each of the ten grades in our public schools, as follows:

For best specimen of work.....	Diploma
For second best specimen of work.....	\$5 00
For third best specimen of work.....	4 00
For fourth best specimen of work.....	3 00
For fifth best specimen of work.....	2 00
For sixth best specimen of work.....	1 00

Taking the ten grades in our public schools, this scheme would have recognized the work of sixty pupils in the county as meritorious and deserving distinction as to quality, and distributed in premiums \$150. The scheme finally adopted, however, by the Directors of the Fair Association, recognized the work of only forty pupils as superior in quality, and distributed only \$30.00 in premiums. It is here presented in part only, as each grade is simply a repetition of the first through all of the ten grades, as follows:

To High School making best exhibit of work done by pupils.....	Diploma
To Primary School making best exhibit of work done by pupils.....	Diploma
To Rural School making best exhibit of work done by pupils.....	Diploma

FIRST GRADE.

For best specimen of work.....	Diploma
For second best specimen of work.....	\$1 50
For third best specimen of work.....	1 00
For fourth best specimen of work.....	50

While it may not be well to give too much importance to these public exhibitions of the work of our pupils, I am convinced that they bring our public schools nearer to the people, encourage the patrons, and diffuse more light and broader views concerning the "new education."

WASHINGTON—P. A. WITMER.

We believe we have reached the maximum enrollment of pupils possible in this county, being nearly one-fourth of the whole population of the county, and therefore report no increase in either enrollment or average attendance. The average attendance is not

as large as it might be or possibly is in some other localities, but this is accounted for by the fact that thousands of the boys and girls of this county are engaged, from early in the spring to late in the fall, in agricultural, mechanical, mercantile and household avocations, thus receiving in the practical work of life a valuable substitute for that industrial education which is so strongly insisted upon by urban educators.

During the past year the Board has built thirteen new school-houses and have added seven rooms to four other houses, or, stated differently, have added twenty rooms to their school accommodations. The foundations have been laid for an additional house to consist of six rooms.

SCHOOL SUPERVISION.

I regard it as a wise provision of the school law of the State that some person, presumably competent to form a correct opinion of school work, and to advance suggestions upon objects embraced in that work, with a view to its improvement, is required to visit the schools and so maintain efficient supervision of every school and every teacher.

Probably, the most important result flowing from the official visits of the examiner is the effect upon the teacher himself. When he recognizes the fact that his work will be inquired into by one whom he regards as competent and disinterested, who, in the proper spirit, will point out his errors or commend his good work, he is stimulated to better efforts and adopts every instrumentality at command to prepare himself for better work. The school itself is benefitted by a judicious examination, receives new inspiration and aims at a higher standard, as has been frequently attested by the voluntary testimony of teachers, in my own personal experience. In large counties, however, like our own, with over two hundred teachers, it is practically impossible for any examiner to visit schools as frequently as seems to be necessary to produce the very best results.

The office work in a county like this requires much of the examiner's time and attention, and, in a school year having less than one hundred and fifty days, he is an exceedingly busy examiner who can make over two hundred visits in the allotted time and yet keep the affairs of the office in that orderly manner which should characterize the business operations of every public corporation or institution. In conclusion upon this topic, I have no doubt of the good effects of frequent visits to schools by examiners who, being properly qualified, enter fully into the spirit of the work.

INSTITUTES, ASSOCIATIONS AND READING CIRCLES.

It is scarcely necessary at this day to enter upon any discussion as to the propriety of organizing Teachers' Institutes, County and District Associations and Reading Circles. They have been so emphatically endorsed by all the leading educators of the County,

and have been so universally recognized as essential elements of any well-organized system of education, that a doubt as to their practical utility can scarcely be entertained. Personally, I have recommended the organization of all these aids in this County, and we have in some localities the District Institute and Reading Circle, and I have no hesitation in saying that those teachers who are identified with the Institute and Reading are everywhere regarded as the most successful in school work, the most ready to discuss and adopt new and improved methods of instruction and discipline, and, generally, the most intelligent educators. At present only one Reading Circle, a large one of thirty members, is at work, but we expect to organize others at an early day. Much interest is manifested in the Circle already organized, but it is too early to speak of results from practical experience.

MANUAL TRAINING.

Nothing special has been done to introduce manual training, considered as an element of school work, into the schools of this County. I made an effort this year to have the Board employ a teacher of drawing, but want of funds was a sufficient excuse for not endorsing my suggestion. As a substitute for the proposition, I was instructed to notify the teachers of the County to prepare for an examination in drawing at the next annual examination, with a view to its general introduction into our schools at the opening of the next school year.

In this connection we may be permitted to state that we do not think that manual training, in the sense of instruction in mechanical art, is at all practicable in country schools nor, indeed, in town schools, without the expenditure of an amount of money entirely disproportionate to, and largely in excess of the present cost of education, and, in my opinion, it is extremely problematical whether the actual results would justify the increased cost.

Although it may be expedient to train the youth of the land, especially in large cities, to a knowledge of industrial or mechanical art, particularly since it has been the policy of labor organizations to greatly restrict, if not to entirely destroy, the system of apprenticeship which was formerly prevalent everywhere, yet we feel quite confident that any attempt at teaching mechanical art in the public schools, except where special schools are established for the purpose, is entirely impracticable.

We may be pardoned some skepticism upon the theory advanced by so many champions of manual training, that employment in the mechanic arts quickens perception, ripens judgment, strengthens will and generally develops mental powers to a degree beyond that which can be attained by mere intellectual culture. History does not convincingly teach that the grandest triumphs of mind, in poetry, eloquence, statesmanship, science itself, were inspired by boyhood's dalliance with the carpenter's jack-plane or the blacksmith's sledge-hammer. The divine afflatus is not pro-

duced, nor the fires of the soul lighted by the mechanical appliances which kindle the flames of the smithy. It is true that the advocates of manual training claim that the best results are secured by an harmonious blending of manual and mental training, but the theory has not yet been satisfactorily demonstrated and we are inclined to the belief that its demonstration, for the present, should be left to those communities which can best afford full indulgence in expensive, empiric education.

SCHOOL LIBRARIES.

At present I know of no school libraries in this County. Attempts have been made in several districts to establish libraries but these attempts have not met with distinguished success, and I have not been able to get from the teachers in charge any satisfactory statement of the causes which have operated adversely. It is possible that the failure to establish district school libraries generally throughout the County, may be attributed in a great degree to the reluctance with which the School Board has made appropriations for this purpose, and this reluctance arises not from any opposition to the establishment of libraries or want of appreciation of their advantages, but from want of funds. In this connection it may be stated, generally, that whilst educators may theorize and crowd suggestion upon suggestion as to what are necessary accessories to a proper system of education, the want of sufficient funds is the great bar to the introduction of much that would contribute to the success of our schools, and this want is not confined to particular localities or States, but is prevalent everywhere, especially in rural districts. The ideal school-house thoroughly furnished and equipped is rare indeed and the average taxpayer is content to accept the ordinary appliances for purposes of education at moderate cost, in preference to that thorough equipment which requires heavy expenditure for its establishment and maintenance.

SCHOOL WORK IN THE COUNTY.

Notwithstanding the difficulty just pointed out, from the general adverse operation of which Washington County has not been exempt, we think considerable progress has been made since I entered upon the duties of the office of Secretary and Examiner in 1868, especially if increased attendance and superior school buildings are to be regarded as criteria of success. In 1868 the population of the County was 33,500, the school enrollment 6,788, and the number of teachers 122. In 1888 the population is 40,000, enrolled pupils 8,836, teachers 200. The increase in population has been 19 per cent., in enrolled pupils 30 per cent., and in teachers 64 per cent. In the same period 100 of the 134 school-houses now occupied have been built and are owned by the County. In 1868 there was not a graded school in the County; now we have twenty-one; one having 14 teachers; one, 9; two, 8; one, 6; two, 5; four, 4; four, 3; six, 2.

In eight of these schools students are prepared for admission to college, and every year quite a number of our pupils enter college in either the Freshman or Sophomore class.

We aim to prepare all pupils who regularly attend the public schools of this County until they are fifteen or sixteen years of age, for the ordinary duties of life, and we think we do fairly equip all such pupils for equal competition with others having like opportunities. Our schools would, no doubt, do better work if we were in a condition to employ better trained and more highly cultured teachers, but as our revenues will not permit this we must be content to select the best of home material.

More than nine-tenths of our teachers, many of whom are intelligent, conscientious, and successful, have been educated in our own schools, and whilst their plan of operation has the disadvantage of continuing, in some cases, much that is defective in school work, it has on the other hand the advantage of perpetuating whatever is meritorious in our methods of instruction and discipline.

With the restrictions imposed upon school administration by resources limited to the minimum of cost, it is difficult to suggest practical improvements in the educational work of the County. We believe that, with the advancement of teachers in a knowledge of their profession, and in broader culture, will come improvement in school work and that a corps of honest, conscientious, intelligent, and well-trained teachers are of more avail than all the suggestions of legislative wisdom or all the finely wrought theories of school examiners. Teachers, it is true, might and ought to do much more for their own improvement. If they should all adopt a regular course of study of education as a science and of sciences closely related to it, I have no doubt that the results of such study would show themselves in a more general intelligence, a broader and stronger influence and a higher standard of public education and public morality.

The undeveloped human mind is a delicate organ which, in the hands of a master may send out the rarest harmonies; in the hands of a bungler, may be untuned and unstrung forever.

If all teachers entertained a right appreciation of the responsibility which confronts them, they would not come with unsympathetic heart or untrained hands to touch keys whose vibrations may either "raise a mortal to the skies or drag an angel down."

WICOMICO—THOMAS PERRY.

Every school building in the County is insured at the rate of one-half per cent. for five years.

I am convinced that a late By-Law of the State Board, requiring examiners to classify certificates, according to the results of the teacher's work in the school-room, has had some beneficial

results. It places upon the examiner an unenviable responsibility, but I consider that the results will fully compensate for it.

Our County is becoming better supplied from year to year with neat, comfortable school-houses.

WORCESTER—C. J. PURNELL. No reply.

HIGH SCHOOLS AND ACADEMIES.

Table M. gives a list of the high schools and academies receiving aid directly or indirectly from the State. In most instances the academy is now incorporated into the County school system, and the statistics will be found in the County report; in a few cases the original independence is maintained, and in a few others there is an understanding between the trustees of the academy and the Board of County School Commissioners, by which the former continues to hold the title to the property while the latter receive the "donation" and conduct the business. In 1866 it seemed to be the policy of the State to give each of the counties \$1,200 a year for the support of an academy. This sum has been regularly paid to the academy, if one were in existence, and, if not, to the School Commissioners for the use of the public schools.

If we are to realize Professor Huxley's idea of a public school system—a ladder, of which the foot is in the gutter and the top at the door of the university; if the spirit of the higher education is to be diffused among the people; if we are to keep alive the humanizing influence of the liberal studies for which Maryland was distinguished in former days, and which is not yet extinct, there should be at least one high school, or its equivalent, in every County. If this should be found impracticable let us have at least one teacher in every County who can give the instruction necessary to fit pupils for college. The additional expense incurred would in a short time be repaid, with interest.

COLLEGES.

The several colleges receiving aid from the State have made reports (Table L), from which it appears that last year was one of increased prosperity with them all.

The establishment of an experimental station in connection with the *Agricultural College*, the enlargement

of the Board of Trustees, and especially the appointment as President of a gentleman eminently qualified by natural gifts and acquired capabilities for the onerous duties of the position, give us reason to believe that this college has at last entered upon a career which entitles it to the hearty support of the people of Maryland.

At *Washington College*, "during the last scholastic year, there were forty-two students in attendance, this being a considerable increase in the past few years. One student was graduated in due course with the degree of A. B.

"The nine county scholars provided for by the Act of 1856, chapter 219, and the six provided for by the Act of 1874, chapter 282, were all filled by creditable students, who received tuition, board, books and stationery free of charge; and five indigent scholars in addition, have received tuition free of charge.

"The county scholarships are again all filled, and the character and tone of the students are generally satisfactory.

"A fourth professor was added to the faculty at the beginning of the last scholastic year, giving increased facilities in the primary department."

JOHNS HOPKINS UNIVERSITY.

Thus far the organization has maintained but one faculty—the faculty of philosophy or the liberal arts—although there is an important nucleus of a department of medicine.

Two classes of scholars are received, (*a*) the collegiate students, who are aspirants for the diploma of Bachelor of Arts, to which they look forward as a certificate that they have completed a liberal course of preliminary study; and (*b*) the university students, including the few who may be candidates for a higher diploma—that of Doctor or Master (a certificate that they have made special attainments in certain branches of knowledge); and a large number who, without any reference to a degree, are simply continuing their studies for varying periods. Corresponding to the wants of these two classes of students, there are two methods of

instruction—the rule of the college, which provides discipline, drill, training in appointed tasks for definite periods; and the rule of the university, the note of which is opportunity, freedom, encouragement and guidance in more difficult studies, inquiries and pursuits.

In 1887-'88 the academic staff included fifty-seven teachers, one of whom was a non-resident lecturer. The number of students enrolled during the year was four hundred and twenty, of whom one hundred and ninety-nine were residents of Maryland, and one hundred and ninety-six came here from thirty-six other States of the Union, and twenty-four from foreign countries. Among the students were two hundred and thirty-one already graduated, coming from ninety-three colleges and universities. There were one hundred and twenty-seven matriculates (or candidates for the degree of Bachelor of Arts); and there were sixty-two admitted as special students, to pursue courses of study for which they seemed fitted, without reference to graduation. The attendance upon the public lectures averaged one hundred and nine-two. The degree of Bachelor of Arts was conferred upon thirty-four candidates, and twenty-seven candidates were promoted to the degree of Doctor of Philosophy.

The following table indicates the enrolment of students in each year since the university was opened in the autumn of 1876:

	Total Enrolled.	Matricu- lates.	Non-Ma- triculates.	Graduates (including Fellows).	Average Attendance at Public Lectures.
1876-77.....	89	12	23	54	60
1877-78.....	104	24	22	58	84
1878-79.....	123	25	35	63	96
1879-80.....	159	32	48	79	113
1880-81.....	176	37	37	102	186
1881-82.....	175	45	31	99	137
1882-83.....	204	49	30	125	148
1883-84.....	249	53	37	159	122
1884-85.....	290	69	47	174	212
1885-86.....	314	96	34	184	115
1886-87.....	378	108	42	228	165
1887-88.....	420	127	62	281	192

The attendance upon the courses given in some of the principal subjects has been as follows during the last year: Mathematics and Astronomy, 84; Physics, 85; Chemistry, 119; Mineralogy and Geology, 25; Biology, 61; Pathology, 15; Greek, 61; Latin, 74; Sanskrit, etc., 40; Shemitic Languages, 18; German, 130; French, Italian, etc., 72; English, etc., 84; History and Political Science, 137; Psychology, Ethics, etc., 81.

During twelve years, twelve hundred and sixty-nine individuals have been enrolled as students, of whom five hundred and seventy have come from Maryland (including four hundred and forty-eight from Baltimore), and six hundred and ninety-nine from fifty other States and countries. Of this number seven hundred and thirty-three persons pursued courses as graduate students, and five hundred and thirty six as collegiate students.

Since degrees were first conferred in 1878, one hundred and seventy-seven persons have attained the Baccalaureate degree, and one hundred and thirty-one have been advanced to the degree of Doctor of Philosophy.

SPECIAL SCHOOLS.

The *State Normal School* is embarrassed by a plethora of numbers, which it is hoped will be only temporary. Since the house was built and furnished, desks have been provided for eighty additional pupils, and these desks are all filled.* The number enrolled in the year ending June 1st, 1888, was 305—women, 273; men, 32. The average daily attendance was 285. Very few students left before the close of the school year.

The *Baltimore Normal School* for the training of colored teachers retains the popularity which it has for many years deserved. The annual commencement of the school, or rather, the annual closing exercises, have attracted the attention of the public; and as an evidence of their interest, a number of gentlemen offered prizes, which proved an effective stimulus to the pupils—three gold medals, nine silver medals and a large number of book premiums. The donors were Mr. Jos. M.

Cushing, Mr. John A. Needles, Mr. Jas. H. Bond, Dr. Wm. E. Story (J. H. U.), Mr. F. H. Boggs, Dr. Thos. Craig (J. H. U.), Mr. John M. Carter, Mr. Clemens Lamping, Dr. Lewis H. Steiner, Mr. John E. McCahan, Prof. F. D. Morrison (School for the Blind), Mr. Wm. M. Isaac, Prof. Otto Fuchs (Maryland Institute), Prof. M. A. Newell.

The schools of art and design in the *Maryland Institute* for the promotion of the mechanical arts have added largely during the year to the former facilities for the study of art. The classes in Free-Hand Drawing, Mechanical Drawing, Architectural Drawing, and in drawing from the antique and from life, have made satisfactory progress, and the exhibition at the close of the session attracted large numbers of intelligent and critical spectators. It would be difficult to find in this country a better school of the kind. What is wanted now is the link that will connect art studies with the practical industries. The whole number of pupils present during the session of 1887-88 was 720, of whom 481 attended the night schools, and the remainder the day school and the Saturday class.

ASSOCIATIONS.

The *State Teachers' Association* met during the third week in July, at Mountain Lake Park, in joint convention with the Teachers' Association of West Virginia. The attendance was large, and the exercises were unusually interesting. The most important transaction was the appointment of a committee (Prof. Alex. Chaplain, of Talbot, chairman; Prof. J. Goodman, of Baltimore city, and Mrs. M. A. Newell, secretary) to inaugurate a State Teachers' Reading Circle, with branches in the several counties. The history of this enterprise belongs more properly to the next school year. A good beginning has been made in the city and several counties. With faith and a fostering hand from the superintendents and examiners success is assured.

The *Association of Public School Commissioners* held their annual meeting in the last week of Novem-

ber. The attendance was not quite as large as it has been in previous years, but the discussions were more than usually lively and important. One of the most interesting was on the propriety of placing women on the Boards of District Trustees, one woman and two men on each Board. The prevailing, though by no means unanimous, sentiment seemed to be in favor of the innovation. Prof. Alexander Chaplain, of Talbot county, read a very interesting paper on the construction of country school-houses, with a special reference to heating and ventilation.

SCHOOL FOR THE BLIND.

Prof. F. D. Morrison, principal, reports :

The number of pupils on the Register July 1, 1887.....	62
Number of pupils admitted during the year.....	21
<hr/>	
Number of pupils under instruction during the year ending June 30, 1888.....	83
Number that left the school during the session by reason of expiration of term or otherwise.....	7
<hr/>	
Number in attendance June 30, 1888.....	76

Of the 83 under instruction during the session ending June 30, 1888, 42 were from the city of Baltimore; 25 from the counties of Maryland; 15 from the District of Columbia, and one from the Territory of Montana.

Blind children do not usually enter school until they are 7 or 8 years of age; but even at this age they are not unfrequently as helpless as ordinary children are at 3 or 4 years of age, owing, in most cases, to the want of proper home training. Except in rare cases, a totally blind child is not taught to do any thing for itself before it is sent to school. Either everything or nothing is done for it at home; it is washed, dressed, fed and entertained long after the age when a bright-seeing child can do those things for itself, or else it is set down in a corner all day out of harm's way, and left to its own devices for amusement. It cannot see what other children are doing, but it must do something; so it gradually acquires the most awkward and ungraceful habits, which require years of patient training to correct after the child enters school.

A school for the blind must not only embrace in its curriculum the ordinary scholastic course, but it must also include physical and moral as well as intellectual training; it must not only be a careful, earnest school-teacher, but it must also be a prudent and faithful parent to the blind child. It is not enough that the blind person is intelligent, properly trained in literature, music and mechanical work, but the school must see that its pupils go out into the world

thoroughly developed men and women morally, intellectually and physically. It is only by the most thorough and careful training that we can hope to enable those, who must work in perpetual night, to hold their own in this busy world.

This Institution is well equipped for its work. The buildings and grounds are ample and attractive; the library is well supplied with suitable books, and the music rooms with excellent instruments; the gymnasium is fitted up with the most modern appliances for physical culture, and the shop contains machinery suitable for proper instruction in the trades taught. In each department are careful and experienced teachers. There is absolutely no good excuse why any blind child in the State of Maryland should not enjoy the advantages of education. The State provides board and tuition for all who cannot afford to pay for them: and yet, strange as it may appear, there are many who do not avail themselves of the opportunity so freely offered them.

M. A. NEWELL.

Secretary.

REPORT
OF THE
SCHOOL COMMISSIONERS
OF
BALTIMORE CITY.

BALTIMORE CITY.

STATEMENT SHOWING THE NUMBER OF MALE AND FEMALE TEACHERS AND THE NUMBER OF PUPILS ON ROLL DECEMBER 31, 1888; THE AVERAGE NUMBER OF TEACHERS AND PUPILS DURING THE YEAR; THE AVERAGE ATTENDANCE FOR THE YEAR; THE PERCENTAGE OF ATTENDANCE FOR THE YEAR; AND THE NUMBER OF PUPILS IN SCHOOL DURING THE YEAR.

No. of school, 8 ; district, 13 ; frame ; cost, \$800.00 ; out-buildings, yes ; fences, yes.

Two of these school-houses, viz., No. 3, E. D. 3, and No. 8, E. D. 13, have been built during the fiscal year ending September 30, 1888, and partly paid for out of the receipts of that year, although the money levied for the purpose was not available until after October 1, 1888. This will account for the apparent discrepancy in the statements.
